Project Trainings

Within the Green ELEMENT project, two training sessions were implemented:

- **Train the Trainer Event in Nicosia, Cyprus**

Participants from across the consortium attended this event, where they were trained on the Green ELEMENT materials. They provided valuable feedback, which helped partners refine the educational materials to better suit the needs of the target group.

- **SME Leaders Training in Rotterdam, The Netherlands**

This session was specifically for SME leaders, focusing on sustainable business practices. Participants were taught the essential competencies for successful green business leadership.

Available on the Website

➔ **State of the Art Report on Green Business Leadership Key Competencies (GBLC) for Business Leaders**

Explore our comprehensive analysis of international, European, and national academic literature on GBLC for business leaders. This report delves into the competencies needed for SME leaders to drive successful green business development.

➔ **GreenELEMENT Trainers e-Handbook**

Access a complete training resource that includes content, teaching materials, activities, and guidelines designed for VET trainers and SME leaders.

Coming Next

GreenELEMENT E-Learning Platform!

This result will be released and will act as the virtual space where SME's leaders and VET trainers will interact with the e-learning material.

Green ELEMENT Events!

In order to disseminate the project objectives and increase its impact each partners will organise an event in which the project's results and milestones will be presented

Final Meeting in Copenhagen!

In July the partners will meet for one last time before the project ends, to discuss about final steps and actions for the Green Element project.
